PROPRIETARY NAMES

THIS Dictionary includes some words which are or are asserted to be proprietary names or trade marks. Their inclusion does not imply that they have acquired for legal purposes a non-proprietary or general significance nor any other judgement concerning their legal status. In cases where the editorial staff have established in the records of the Patent Offices of the United Kingdom and of the United States that a word is registered as a proprietary name or trade mark this is indicated, but no judgement concerning the legal status of such words is made or implied thereby.

The Greek word is evidently of oriental origin, but whether it has any relation either of etymology or sense with the Heb. is uncertain, as is also the meaning and origin of the latter, which the LXX had rendered in Genesis by ἄνθραξ 'carbuncle,' and in Numbers by κρύσταλλος 'crystal': the Rabbins and Bochart explain it as meaning 'pearl, pearls.']

be (bi:), *v.* [An irregular and defective verb, the full conjugation of which in modern Eng. is effected by a union of the surviving inflexions of three originally distinct and independent verbs, viz. (1) the original Aryan substantive verb with stem *es-*, Skr. *as-*, *'s-*, Gr. *'εσ-*, L. *es-*, *'s-*, OTeut. **es-*, *'s-*; (2) the verb with stem *wes-*, Skr. *vas-* to remain, OTeut. *wes-*, Gothic *wis-an* to remain, stay, continue to be, OS., OE., OHG. *wesan*, OFris. *wes-a*, ON. *ver-a*; (3) the stem *beu-* Skr. *bhū-*, *bhaw-*, Gr. *φυ-*, L. *fu-*, OTeut. **beu-*, *beo-*, OE. *béo-n* to become, come to be. Of the stem *es-*, OE. (like the oldest extant Teutonic) possessed only the present tenses, Indicative and Subjunctive (orig. Optative), all the other parts being supplied from the stem *wes-*, pa. t. *was*, which, though still a distinct and complete vb. in Gothic, was in OE. only supplemental to *es-*, the two constituting the substantive verb *am-was*. *Béon*, *be*, was still in OE. a distinct verb (having all the present, but no past tenses) meaning to 'become, come to be', and thus often serving as a future tense to *am-was*. By the beginning of the 13th c., the Infinitive and Participle, Imperative, and pres. Subjunctive of *am-was*, became successively obsolete, the corresponding parts of *be* taking their place, so that the whole verb *am-was-be* is now commonly called from its infinitive, 'the verb *to be*,' although *be* is no part of the substantive verb originally, but only a later accretion replacing original parts now lost.

In OE. the present Indic. of *am* had two forms of the plural, (1) *sind*, *sindon* (= Goth. and Ger. *sind*, L. *sunt*, Skr. *sánti*) and *earon*, *aron* (= ON. *eru*), the latter confined to the Anglian dialects, where it was used side by side with *sind*, *-un*. Of these, *sind*, *-on* ceased to be used before 1250, its place being taken in southern Eng. by the corresponding inflexions of *be*. We, ye, they *beth*, *ben*, *be*, were the standard forms in southern and midl. Eng. for centuries; and even in the sing., *be*, *beest*, *beth* began to encroach on *am*, *art*, *is*, and are now the regular forms in southern dialect speech. Meanwhile *aron*, *aren*, *arn*, *are*, survived in the north, and gradually spread south, till early in 16th c. *are* made its appearance in standard Eng., where it was regularly used by Tindale. *Be* continued in concurrent use till the end of the century (see Shakspere, and Bible of 1611), and still occurs as a poetic archaism, as well as in certain traditional expressions and familiar quotations of 16th c. origin, as 'the powers that be.' But the regular modern Eng. plural is *are*, which now tends to oust *be* even from the subjunctive. Southern and eastern dialect speech retains *be* both in singular and plural, as 'I be a going,' 'we be ready.']

In treating this important word, the history of the inflexions is first exhibited, and then that of the signification.

B. Signification and uses.

[The primary sense appears to have been that of branch II below, 'to occupy a place' (i.e. *to sit*, *stand*, *lie*, etc.) in some specified place; thence the more abstract branch I was derived by abstracting the notion of particular place, so as to emphasize that of actual existence, 'to be somewhere, no matter where, to be in the universe, or realm of fact, to have a place among existing things, to exist.' Branch III was derived from II by weakening the idea of actual presence, into the merely intellectual conception of 'having a place' in a class of notions, or 'being identical with' another notion: 'centaurs are imaginary creatures' = 'centaurs have their place in the class of creatures of the imagination.' Branch IV is an obvious extension of III: cf. 'it was annoying to me,' with 'it was annoying me.']

be, variant of BEE *sb.*

be, obs. and dial. form of BY *prep.*; see next.

be- *prefix*:—OE. *be-*, weak or stressless form of the prep. and adv. *bí* (*biȝ*), BY. The original Teut. form was, as in Gothic, *bi*, with short vowel, prob. cognate with second syllable of Gr. ἀμφί , L. *ambi*; in OHG. and early OE., when it had the stress, as a separate word, and in composition with a noun, it was lengthened to *bī* (*bî, bí*), while the stressless form, in composition with a vb. or indeclinable word, remained *bi-*; in later OE., as in MHG. and mod.G., the latter was obscured to *be-* (also occasional in OE. as an unaccented form of the preposition): cf. OE. *bí-gęng* practice, *bi-gangan, be-gangan*, to practise. In early ME. the etymological *bi-, by-* regularly reappeared in comp. as the stressless form; but in later times *be-* was finally restored. (On the other hand, *be* was used by northern writers as the separate prep., as still in mod. Sc.) In modern use, the unaccented prefix is always *be-*; the accented form *by-* (sometimes spelt *bye-*) occurs in one or two words descended from OE., as *'by-law*, *'by-word* (OE. *bí-laȝe*, *bí-word*), and in modern formations on the adv., as *'by-gone*, *'by-name*, *'by-play*, *'by-road*, *'by-stander*.

The original meaning was 'about.' In prepositions and adverbs this is weakened into a general expression of position *at* or *near*, as in *before* (at, near, or towards the front), *behind, below, beneath, benorth, besouth, between, beyond.* With verbs, various senses of 'about' are often distinctly retained, as in *be-bind, be-come* (= come about), *be-delve, be-gird, be-set, be-stir.* In such as *be-daub, be-spatter, be-stir, be-strew*, the notion of 'all about, all round, over,' or 'throughout,' naturally intensifies the sense of the verb; whence, *be-* comes to be more or less a simple *intensive*, as in *be-muddle, be-crowd, be-grudge, be-break*, or specializes or renders figurative, as in *befall* (to fall as an accident), *be-come, be-get, be-gin, be-have, be-hold, be-lieve.* In other words the force of *be-* passes over to an object, and renders an intransitive verb transitive, as in *be-speak* (speak about, for, or to), *be-flow* (flow about), *be-lie, be-moan, be-think, be-wail.* Hence it is used to form transitive vbs. on adjectives and substantives, as in *dim be-dim, fool be-fool, madam be-madam*; also others, in which the sb. stands in an instrumental or other oblique relation, as *be-night* 'to overtake *with* night,' *be-guile, be-witch.* Of these a special section consists of verbs having a privative force, as OE. *belandian, behéafdian*, to deprive of one's land, one's head: cf. *bereave*, and OE. *benim-an* to take away. Finally, *be-* is prefixed with a force combining some of the preceding, to ppl. adjs., as in *be-jewelled, be-daughtered.*

Be- being still in some of its senses (esp. 2, 6, 7 below) a living element, capable of being prefixed wherever the sense requires it, the derivatives into which it enters are practically unlimited in number. The more important, including those that are in any way specialized, or that require separate explanation, are treated in their alphabetical places as Main Words. (In the case of ME. words in *bi-, by-*, all that survived long enough to have BE- appear under this spelling; a few that became obsolete at an early date are left under their only extant form in BI-, BY-.) Those of less importance, infrequent (often single) occurrence, and obvious composition, are arranged under the following groups (in which, however, the senses tend to overlap each other, so as to make the place of some of the words ambiguous):—

1. Forming derivative verbs, with sense of 'around': **a.** all round externally, on all sides, all over the surface, as in BESET, BESMEAR; **b.** from side to side (within a space), to and fro, in all directions, in all ways, in or through all its parts, thoroughly, as in BESTIR, *bejumble.* (Some of these formations appear only in the pa. pple.)

3. Forming derivative verbs with privative meaning 'off, away,' as in BEDEAL, BENIM, BEREAVE. A very common use of *be-* in OE. and ME., prob. originating in words like BE-SHEAR, 'to cut all round,' whence 'to cut off or away'; but no longer in living use in forming new derivatives.

4. Making verbs transitive, by adding a prepositional relation: primarily 'about,' as in BE-SPEAK, speak about (or for, to), BE-MOAN, moan about (or over); which sense can usually be detected under the various *against*, *at*, *for*, *to*, *on*, *upon*, *over*, *by*, etc. required by modern idiom: **†bebark**, to bark around or at; **†becack**, to deposit ordure on; **bechatter**, to environ with chattering, etc.; **†bechirm**, to chirm (as birds) around; **†bechirp**, to chirp about; **beclang**, **beclatter**; **†becrave** (OE. *becrafian*), to crave for; **becrawl**, to crawl all over; **becroak**, to croak round or at; **†becry**, to cry at, accuse; **bedin**, to fill with din or noise; **bedribble**, to dribble upon (e.g. as a dog); **bedrivel**; **bedrizzle**; **†bedwell**, to dwell in or around; **†befleet**, to flow round; **†befret**, to fret or gnaw away; **befuddle**, to make stupid with tippling; **begaze**, to gaze at; **†beglide**, to slip away from, escape; **†beglitter**, to irradiate; **begroan**, to groan at; **†begruntle**, to make uneasy; **behoot**, to hoot at; **bejuggle**, to get over by jugglery, to cheat; **†belag**, to make to lag; **†beleap**, to leap on, 'cover'; **†bemew**, **†bemoult**, to mew or moult upon; **bemurmur**, to murmur at or against; **†bemute** (of birds), to mute or drop dung on; **beparse**, to plague with parsing; **bepiss**, to piss on, wet with urine; **bepreach**, to preaeh at; **bereason**, to reason with, overcome by reasoning; **†bireme**, to cry out upon; **beride** (OE. *berídan*), to ride beside, to override; **†berow**, to row round; **†bescumber**, to scumber on; **beshine** (OE. *bescínan*), to shine on; **beshit(e** (OE. *bescítan*) = *becack* (*Obs.* in polite use, but common in ME. and early mod.E. literature); **beshout**, to shout at, applaud; **†beshriek**, to shriek at; **†besigh**, to sigh for; **†besmell**, to smell out; **besmile**, to smile on; **†bespew**, to spew on; **bestare**, to stare at, to make staring; **bestraddle**, to straddle across, bestride; **bestream**, to stream over; **beswarm**, to swarm over; **†beswelter**; **beswim**, to swim upon; **bethunder**; **†betipple**, to muddle by tippling; **betravel**, to travel over, to overrun with travellers: **bevomit**, to vomit all over; **bewhisper**, to whisper to; **bewhistle**, to whistle round.

7. Forming participial adjectives, which unite the preceding senses, esp. 6 and 2, in the notion of 'covered or furnished with,' usually in a conspicuous, ostentatious, unnecessary, or overdone way. In modern use (e.g. with Carlyle) the force of the *be-* is often merely rhetorical, expressing depreciation, ridicule, or raillery, on the part of the speaker, towards the appendage or ornamentation in question; cf. *booted* and *bebooted*, *gartered begartered*, *wigged bewigged*. Some of these words have no form without *be-*, and closely approach the verbs in 5, e.g. *bedaughtered*, *bepilgrimed* 'overrun with pilgrims.' This is now the most frequent use of *be-*, and the formations of this kind are endless; e.g. ***be-aureoled***, ***bebelted***, ***becloaked***, ***becoroneted***, ***becupolaed***, ***bediamonded***, ***bedragoned***, ***befathered***, ***befezzed***, ***beflogged***, ***beflounced***, ***befrilled***, ***begoggled***, ***bejacketed***, ***bejeaned***, ***bemitred***, ***bemotored***, ***bemuslined***, ***beperiwigged***, ***beribboned***, ***beringleted***, ***beskirted***, ***besleeved***, ***betabbed***, ***betrousered***, ***beturbaned***, ***beuncled***, ***bevillaed***, ***bewinged***. beach (bi:tʃ), *sb.* Forms: 6– **beach**; also 6 **bache**, **bayche**, 7 **beatch**, 7–8 **baich**(e, 8 **beech**. [Origin unknown: apparently at first a dialect word, meaning, as it still does in Sussex, Kent, and the adjacent counties, the shingle or pebbles worn by the waves. Thence the transference of the term to the place covered by 'beach,' was easy for those who heard such phrases as ' to lie' or 'walk on the beach,' without knowing the exact significance. The Fr. *grève* shows precisely the same transference. The spelling shows that the pronunciation in 16–18th c. was (be:tʃ). If OE., the type would be **bæce*. A derivation from ON. *bakki* 'bank,' which has been proposed (for sense 3), is not admissible phonologically: (cf. BACHE). Another conjecture would derive *beach* from *bleach*:—OE. *blǽce*, f. *blác* white, with loss of *l*, of which there is however no evidence.]

V.* IV. i. 71, 'the Fishermen, that walk'd vpon the beach ' *Lear* IV. vi. 17, might as well belong to 1.)

Forms: *Inf.* 1 ber-an, (2 beor-en, bor-en), 2–5 ber-en, 3–6 ber-e, (4 berne, bern), 4–5 ber, 5 beere, *Sc.* 5–6 beir(e, 5–7 beare, (5–8 bare, 6 baire, berie), 6– bear. *Pa. t.* 1–2 bær (*pl.* bǽron), 2–5 ber, bar (*pl.* beren), 4–5 bere, 4–8 bare, (4 beir, beere, baar); 5– bore (*rare* till *c* 1600), 6 boore; *Sc.* 5 bur, 5–6 buir, 6–8 bure; (5 baryd, 7 beared). *Pa. pple.* 1–4 boren, (4–5 borin(e, 5 borun), 4–7 born (*rare*), 5–7 borne (*usual*); also 2–4 iboren, 3–5 ibore, ybore, ibor, (5 ebore), 3–8 bore, (4–5 bor, 6 *arch.* yborne, ybore), 8–9 borne, born differentiated. [Common Teut., and Aryan: OE., OS., OHG. *ber-an*. ON. *ber-a*, Goth. *bair-an*:—OTeut. stem *ber-* = L. *fer-*, Gr. *φερ-*, Skr. *bhar-*. (The compound form, Goth. *ga-bairan*, OHG. *ga-beran*, OS. *gi-beran*, OE. *ȝeberan*, ME. IBERE, is in some of the langs. more usual than the simple verb: cf. MHG. *gebern*, mod.G. *gebären* in sense IV). As the senses of *carry a burden*, and *bring forth fruit* or *offspring*, are both found in the word and its derivatives in the Aryan languages generally, from the earliest period, it is not certain which is the primitive; possibly branch IV preceded I in prehistoric times. In mod.Eng. the originally short vowel of the present has been lengthened by position (*orig.* bɛr, *now* bɛə(r)). The pa. t., in Gothic *bar*, pl. *bêrun*, was regularly in OE. *bær*, *bæron* (Anglian *béron*); early ME *bar*, *beren*, afterwards by levelling of sing. and pl., in south *ber*, *beren*, *beeren*, in north *bar(e*, *baren*, *bare*, which became the literary form. The later *bore*, assimilated in vowel to the pa. pple., appears in w. midl. texts, about 1400; it was not general till after 1600; the Shaks. folio of 1623 has *bore* and *bare*, but the Bible of 1611 only *bare*. The corresponding Sc. *bure*, *buir* (pointing to earlier *ō*) is found in 15th c. As to the two forms of the pa. pple., *borne*, *born*, see 44 below. The ME. *iboren* may also be referred to the derivative IBERE (see above), which cannot be separated in sense from the simple verb.]

44. The various forms of the pa. pple. had formerly no distinction of sense. In the earlier part of the 17th c., these were *borne* (usual), *born*, *bore* (rare). About 1660, *borne* (the only spelling in Shaksp. folio of 1623) was generally abandoned, and *born* (cf. *torn*, *worn*) retained in all senses, with *bore* as a frequent variant (the latter perhaps not in sense of *nātus*). Dr. Johnson, in his various edd. from 1751 to 1773, says under BEAR, 'part. pass. *bore* or *born*,' and the same is found in other dicts. and grammars of the period. But *c* 1775, a different usage (which some writers or printers had observed as early as 1750) was established: *bore* (common in Addison, Swift, Thomson) was abandoned, *borne* was reinstated, and now used as the ordinary form, and *born* was restricted to a specific sense. Thus, *borne* is now the only pa. pple., active or passive, in senses 1–42 (he has *borne* a burden, the tree has *borne* fruit, the testimony *borne* by him); it is also used in sense 43 in the active always, and in the passive with *by* and name of the mother, that is when it has the literal sense of 'brought forth.' *Born* is used only in sense 43, and there only in the passive, when not followed by *by* and the mother; it has rather a neuter signification = 'come into existence, sprung' without explicit reference to maternal action; hence it is the form used adjectively, and figuratively. Cf. 'She had *borne* several children, the children *borne* to him by this woman, *born* of the Virgin Mary, *born* in a stable, her first-*born* son, a lady *born*, new-*born* zeal, a flower *born* to blush unseen.'

b. *Radio.* The periodic variation of amplitude produced by the combination of oscillations of different frequencies. Also *attrib.*

1918 W. H. ECCLES *Wireless Telegr.* Gloss., *Beats* occur when two oscillations of differing frequencies occur simultaneously in the same system. The gradual change of phase difference causes the amplitudes to be opposed at one instant, and to concur at a later instant, with all the intermediate stages in the interval; the time between two successive oppositions, *i.e.* between two instants of minimum resultant amplitude, is called the time of a beat. The beat frequency is therefore equal to the difference between the frequencies of the two oscillations. *Ibid.*, *Beat Reception* (or Interference Reception) is the process of making high-frequency oscillations received by an antenna audibly evident by combining with them other oscillations of suitably different frequency. 1921 L. B. TURNER *Wireless*

beat (bi:t, *dial.* be:t), *sb.*[2] Forms: 5 bete, 6 beit, 7 bayt, 8 bait, 8– beat, 9 beet. [Of uncertain form and etymology; the 15th c. *bete* and 18th c. frequent *bait*, point to *beat* as the 16th c. and normal modern form, *bait* being only a phonetic variant at a time when the pronunciation was still (be:t) as in *great*, and *beet* being a modern phonetic spelling since the pronunc. became (bi:t) as in *meat, meet*. Possibly from the vb. *beat*, in sense of a 'beating,' or quantity to be beaten at once; see BEAT *v.*[1] 24, and cf. *stack*, etc.] A bundle of flax or hemp made up ready for steeping.

c **1450** HENRYSON *Mor. Fab.* 60 The Lint ryped, the Churle pulled the Lyne, Ripled the bolles, and in beites it set; It steeped in the burne, and dryed syne, And with ane beittel knocked it and bet, Syne swyngled it well, and hekled in the flet. *a* **1500** *Cath. beat (bi:t, be:t), *sb.*[3] Forms: also 7 baite, 7–9 bait, 8–9 bate. [Of doubtful phonetic form, and unknown origin. The modern Devonsh. pronunciation is (be:t) variously spelt *bait, bate, beat*. Although *bait* occurs constantly in Gervaise Markham, *beat*(*e* was the spelling of the vb. with Fitzherbert in 1534, Carew in 1602, and of the sb. with Worlidge in 1681, and is apparently the proper form. The vb. is found nearly a century before the sb., and may thus be its immediate source, but on general grounds, the converse is more likely.

The suggestion that *beat* is another form of PEAT, is incompatible with the history of the latter, q.v. The ON. *beit* 'pasturage,' *beiti* 'pasture,' also 'heath, ling,' would barely do for the sense, and phonetically would give *bait*, not *beat*. See BEAT *v.*[2]]

beat generation. [Etym. disputed; the evidence suggests that it is f. BEAT *ppl. a.* 1 b, perh. infl. by BEAT *sb.*[1] 4, but the coiner of the expression, J. Kerouac (1922-69), conneeted *beat* with BEAT(ITUDE (see quot. 1958[1]).] An expression applied at first to a group of young people, predominantly writers, artists, and their adherents, in San Francisco, later to similar groups elsewhere, adopting unconventional dress, manners, habits, etc., as a means of self-expression and social protest.

It involves a sort of nakedness of mind. **1955** 'JEAN-LOUIS' [= J. Kerouac] in *New World Writing* 10 Jazz of the Beat Generation... I. The sleeping-place of men or animals.

1. a. A permanent structure or arrangement for sleeping on, or for the sake of rest. In some form or other it constitutes a regular article of household furniture in civilized life, as well as part of the equipment of an army or expedition. It consists for the most part of a sack or mattress of sufficient size, stuffed with something soft or springy, raised generally upon a 'bed-stead' or

support, and covered with sheets, blankets, etc., for the purpose of warmth. The name is given both to the whole structure in its most elaborate form, and, as in 'feather-bed,' to the stuffed sack or mattress which constitutes its essential part. (A person is said to be *in bed*, when undressed and covered with the bedclothes.)

[ME. *bidene*, a word of constant occurrence in northern ME. verse, but of uncertain origin; its senses run partly parallel with those of ANON, but it is often used without any appreciable force, as a rime word, or to fill up the measure. Its latter part is almost certainly the early ME. adv. *æne, ene*, OE. *æne* 'once, at once, in one, together' (cf. the ME. phrases *at ene* at once, *for ene* for once, and see ENE): but the *bid-* is difficult of explanation.

Marsh and Mätzner compared Du. *bijdien*, MDu. *bidên, bidien*, LG. *bidên* 'by that, thereby, beside that,' which must be discarded; Stratmann compared LG. *binêne* (? for *bî êne*), and suggested that *bidene* might be for *bi ene*, but offered no explanation of the *-d-*. Prof. Zupitza (note to *Guy of Warwick*, 15th c. version, l. 2408) suggests a corruption of **mid ene*, comparing MHG. *mitein, mit eine*, 'together, *unà.*' This completely suits the sense; also, the change of initial *m* to *b*, though unusual, is not unexampled; cf. esp. MHG. *bitalle* for *mit alle* 'wholly, entirely.' But there are historical difficulties in the non-appearance of **mid æne* in OE., or of *mid éne, bidene*, in early southern ME., where alone *mid* was retained; in the rise and use of *bidene* in the north, where *mid* was not retained in ME; and in the fact that the Old Northumbrian had not *mid*, but *mið*, so that the Anglian form would have been *mið éne.* These difficulties are only partially removed, if, for *mid*, we start from the more northern *with.* In the *Old Usages of Winchester* (*E.E. Guilds*), we see *wiþ-inne, wiþ-owte*, transformed into *by-þinne, by-þowte*, through assimilation to *by*; similarly **wið ene, *wiþ ene*, might be changed into **bi-ðene, *by-þene*; but the change of the latter into *bi-dene*, would still remain to be explained.]

†bedstaff ('bɛdstɑ:f, -æ-). *Obs.* Pl. -staffs, staves. [see STAFF.] A staff or stick used in some way about a bed. Formerly well-known as a ready weapon: hence, probably, the phrase *in the twinkling of a bedstaff*: cf. 'the twinkling of an eye.'

a. Dr. Johnson explains it as: 'A wooden pin stuck anciently on sides of the bed-stead to hold the cloaths from slipping on either side.' (For this, no authority is given, and no corroborative evidence has been found.) **b.** The stout sticks or staves laid (loose) across the bed-stocks in old wooden bedsteads, to support the bedding (the precursors of the modern 'laths'), are in Scotland called *bed-rungs* (*rung* = staff, cudgel), and in some parts of England *bed-sticks*: they often served as improvised weapons. **c.** When a bed is fixed in a recess, a stick or staff is used to help in making it, and sometimes called a *bed-stick*. One of these (*G. verum*) has long borne the legendary name of *Our Lady's Bedstraw* (cf. the similarly allusive *Our Lady's Garters, Mantle, Slippers, Smock*, etc., etc.); whence recent writers have somewhat irrationally taken 'Bedstraw' as an English book-name for the whole genus making 'Our Lady's B.' a species.

The earlier Eng. translations, and the Douay, followed the Vulgate in identifying them in form, but the Geneva Bible of 1560, followed by the 'Authorized' of 1611, represent the O.T. word more exactly as *Baal-zebub.* From the N.T. designation of Beelzebub as 'prince of demons,' the word became at an early period one of the popular names of the Devil. I. 1. a. An alcoholic liquor obtained by the fermentation of malt (or other saccharine substance), flavoured with hops or other aromatic bitters. Formerly distinguished from *ale* by being hopped; but now the generic name of malt liquor, including ale and porter, though sometimes restricted and used in contradistinction to ale. The word occurs in OE., but its use is rare, except in poetry, and it seems to have become common only in the 16th c. as the name of hopped malt liquor. Not in Chaucer or *Piers Ploughman.* See further under ALE.

II. To beet a fire.

[The development of this (the chief extant) sense, the antiquity of which is shown, not merely by the OS. *fýr bétan*, but by its existence in the other Teutonic languages (cf. Du. *vuur boeten*, LG. *für böten*, etc.), is somewhat obscure, from the fact that in the earliest instances it appears to mean, not 'to *mend* a fire,' but as in modern Dutch, 'to *make*, *kindle*, *put on* a fire.' Perhaps this is to be explained by the primitive conditions (which prevailed more or less till the days of phosphorus matches), according to which fire was not generated anew each time it was required, but was usually propagated by a 'glede' from an existing fire, often carried and kept alive for days (cf. Genesis xxii. 6), which was surrounded with combustibles, and 'beeted' into a blaze, when a fire was required.]

The form *betlas*, pointing to a nom. *betel*, has not been etymologically explained, but it may, if genuine, be the source of ME. *betylle*, 16th c. *betel*, mod. *beetle*, though the latter may also be from the normal *bitela*, with the vowel lengthened, as in *evil* from OE. *yfel*, *weevil* from OE. *wifel* (OHG. *wibil*), Sc. *meikle* from OE. *mycil*, dial. *leetle* from *little*, etc. The later forms are confused with those of BEETLE *sb.*[1], whence also confusion in their fig. use: see sense 3.]

beetle ('bi:t(ə)l), ? *a.* In beetle brows, beetle-browed. Forms; 4 bitel, bytel(l, 5 betyl, bittil, 6 beetell, -ill, -yll, 7 betle, bittle, 6– beetle. [Found first in the comb. *beetle-browed* (1362); much later (1532), *beetle* is treated as a separate word in *beetle brow(s*; whence a derived verb to BEETLE (see next) formed by Shakspere.

(As the 14–15th c. form had *bitel-*, *bytel-*, it has been proposed to identify it with BITEL *a.* 'biting, cutting like a sharp-edged tool,' used by Ormin and Layamon, which is phonetically possible: but, beside the hardly satisfactory sense, there is the difficulty that *bitel* appears to have been obsolete for 160 years when the first example of *bitel-brouwed* occurs. It is more likely that the word here is one of the two sbs. BEETLE, both extant in 14th c., and both having the form *bitel*. The choice depends largely upon the exact meaning originally attached to 'beetle-browed,' which was a reproachful epithet, and appears to have referred to the shaggy prominence of the eye-brows. (*Brow* in ME. was always = eyebrow, not = forehead.) It is probable therefore (as suggested by Dr. F. Chance) that the comparison is to the short tufted antennæ of some species of beetles, projecting at right angles to the head, which may have been called 'eyebrows' in Eng. as well as in Fr.; for in French the expression *sourcils de hanneton* 'cockchafers' eyebrows' is the name given to a species of fringe made in imitation of the *antennæ* of these insects.)]

1. beetle-browed: 'Having prominent brows,' Johnson; 'having black and long eyebrows,' Bailey (1782); with earlier authorities 'Having shaggy, bushy, or prominent eye-brows'; see esp. quots. 1400, 1591. Dr. Johnson's explanation probably owes something to the sense attached to BEETLE *v.*[1] Almost always reproachful, and sometimes in 17th c. simply = lowering, scowling, sullen, surly. Cf. *supercilious* f. L. *supercilium* 'eyebrow.'

7. To make (one's way) begging.

1840 DICKENS *Old C. Shop* xliv, To-morrow we will beg our way to some quiet part of the country.

[The notion that *beg* had to do with the *bag* carried by a beggar, as if he were a 'bagger,' finds no etymological corroboration. The Flemish *beggen* appealed to by Littré under *Beguin* has no existence (Cosijn). Mr. H. Sweet has suggested that ME. *beggen* might be worn down from the rare OE. *bedecian* 'to beg,' found once (in *Past. Care*), and obscurely connected with Gothic *bidagwa* 'beggar,' f. *bidjan* 'to ask, beg.' This has much to recommend it; but the phonetic connexion of *beggen* and *bedecian* is by no means established, and there is the serious historical difficulty that no connecting links are to be found, there being no trace of the word in any form between K. Ælfred's *bedecian* before 900 and the regular use of the modern *beg* and *beggar* in the 13th c. Perhaps the most likely derivation is from the OF. *begart*, *begard*, and *begar*, med. L. *begardus* = BEGHARD, or its synonym *beguin*, BEGUIN, and deriv. vb. *beguigner*, *beguiner* 'to act the beguin.' It is known that the *Beghards* or *Beguins* were, or soon became, a lay mendicant order, and that in the 13th c. mendicants calling themselves, or ealled, by these names, swarmed over Western Europe, 'laici, qui sub prætextis cujusdam religionis fictæ Begardos se appellant.. qui extra religionem approbatam validam mendicantes discurrunt' (Council of Treves 1310). It is notable that in one of the two passages where Britton has Anglo-French *begger* to beg (see 4 above), the reading of two 14th c. MSS. is *beguigner*, showing that this was at any rate identical in sense with 'beg.' So also we find in Sym. de Hesdin *a* 1380 (Godef.), 'il n'y eust pas tant de begars et de begardes qui mengassent leur pain en oiseuse' (there would not have been so many begards, male and female, to eat their bread in idleness), which strongly suggests the Eng. *beggar*. About this time the words *beggare* and *beggen* arose in English: the exact process of their formation, and their actual relation to each other can only be conjectured: possibly *begg-en* was shortened from *beguin-er*, possibly it was taken from *begg-are*, and this directly from OF. *begar* above. The *-are* of the Ancren Riwle proves nothing, being the regular agent ending, as seen in *bacbitare*, *demare*, *reuare*, etc.]

†**beg,** *sb.*[1] *Obs.* Also 7 becg. [a. Osmanli *beg* 'prince, governor,' now pronounced as *bey*: see BEY, and cf. BEGUM.] A bey. Now only used as part of Eastern names. *beg beg* = BEGLERBEG.

Beghard ('bɛgəd). [ad. med.L. *beghardus*, *begardus*, *beggardus*, *begehardus*, *begihardus* (see Du Cange); cf. F. *béguard*, OF. *bégard*, *-art*, Flemish *beggaert*, MHG. *beghart*, *begehard*, either directly from the same word as BEGUINE (i.e. the surname *Bègue*), or at a later date from *béguine* itself, with the masc. ending *-ard*, *-hard*, here pejorative; see -ARD. OF. had also a masc. *béguin*, in which the pejorative sense was absent; and a fem. *bégarde* formed on *bégard*, with its reproachful force.

This word has been the subject of much etymological conjecture. An extraordinary error, which appears even in Littré, refers it to an alleged Flemish *beggen* 'to beg,' which never existed. (On the contrary, OF. *begard* may be the source of the English *beggar* and *beg*; see these words.) It has been by some referred directly to the adj. *bègue* 'stammering' as if it meant originally 'stammerer,' and has been 'derived' in various other ways. But its origination in the name of *Lambert Bègue* is 'now established beyond all dispute' (Prof. Cosijn).]

A name given to the members of certain lay brotherhoods which arose in the Low Countries early in the 13th c., subsequent to, and in imitation of, the female BEGUIN. 'They took no vow, and were allowed to leave the company when they liked.' The name is said soon to have been adopted by many who were simply idle mendicants: see BEGGAR. From the 14th c. they were denounced by Popes and Councils, and persecuted by the Inquisition. In the 17th c. such of them as still survived were absorbed in the Tertiarii of the Franciscans. (The name was sometimes thrown abusively at other 'heretics,' as the Albigenses and Waldenses.)

'*Gi-nn-an* might originally be a form of the *nu-* class, in which, as in *ri-nn-an, skî-n-an*, and other verbs, the formative of the present was carried over into the other tenses' (Sievers). The transition of sense from 'open up' to 'begin,' is a frequent one: cf. F. *entamer*, Eng. ATTAME; also Ger. *eröffnen* and Eng. 'open' a speech, 'open' fire, 'open up' negotiations; also the parallel use of 'close, close up, conclude, shut up,' in sense of 'to end.' *Beginnan* was very rare in OE., where the ordinary word was *ǫnginnan*: see ONGIN, AGIN, and the aphetic GIN, GAN. As in other verbs having grammatical vowel change in the pa. t., there was an early tendency to level the forms of the 1–3 sing. *began*, and of the 2 sing. *begunne*, pl. *begunnon*, which has resulted in the establishment of *began* as the standard form; but an alternative from the old plural *begun* has also come down to the present day. The rare pa. pple. *began* shows form-levelling in another direction. The Sc. forms *begouth, begoud*, seem due to some form-association with *couth, could*, probably through the aphetic form *gan*, which became in Sc. *can*, and was thus identical in form with *can* 'to be able.']

Beguine (be'gin, 'bɛgɪn). Forms: 5 bygyn, begyne, 6 begine, -ghine, -gyn, biggayne, 7 beguin, beggin, 6– beguine. [a. F. *béguine* (13th c. in Littré), in med.L. *beguīna*, *begīna*, *beghīna* (Du Cange), an appellative derived from the surname of Lambert Bègue or *le Bègue* ('the Stammerer'), a priest of Liège, in the 12th c., the founder of the order.

(Cf. the annal of 1180, quoted in Du Cange: 'God stirred up the spirit of a certain holy priest, a man of religion, who was called Lambert le Bègue (because he was a stammerer) of St. Christopher [in Liège], from whose surname women and girls who propose to live chastly, are called *Beguines*, because he was the first to arise and preach to them by his word and example the reward of chastity.' The cap *béguin* derives its name from them, and not *vice versâ*.)]

A name for the members of certain lay sisterhoods which began in the Low Countries in the 12th century, who devoted themselves to a religious life, but did not bind themselves by strict vows, and might leave their societies for marriage. They were protected by Pope John XXII, when he persecuted the male Beguins or Beghards, and are still reprcsented by small communities existing in the Netherlands, with an organization somewhat similar to some Anglican sisterhoods.

behalf (bɪ'hɑ:f). Forms: 4 bihelue, bihalf, 4–5 bi-, byhalve, 4–6 behalve, 4–7 behalfe, 6 behave, 5– behalf. *Pl.* 6–7 behalfes, behalfs. [Used only in the phrases *on, in behalf (of), in, on (his,* etc.) *behalf*, which arose about 1300, by the blending of the two earlier constructions *on his halve* and *bihalve him*, both meaning 'by or on his side': see HALF. By the mixture of these in the construction *on his bihalve*, BIHALVE, previously a preposition, and originally a phrase, *be healfe* 'by (the) side,' became treated, so far as construction goes, as a sb., and had even a plural *behalfes, behalfs* in 16–17th c. The final *-e* of ME. was the dative ending. In modern use, construed either with a possessive pronoun (in my behalf), a possessive case (in the king's behalf), or with *of* (in behalf of the starving population); the choice being determined by considerations of euphony and perspicuity. Formerly *of* was sometimes omitted.]

(acc. *behǽse*) was the regular repr. of OTeut. **bihait-ti-*, abst. sb. f. *bihait-an*, in OE. *behátan* to BEHIGHT (see Sievers, *Ags. Gr.* §232); thence, early ME. *bihese*, soon altered to *bihes-te*, by form analogy with words in *-te*, OE. *-t*. For full phonetic history see HEST. The OE. *bihǽs*, like the vb. *bihátan*, occurs only in the sense of 'promise, vow,' but in ME. *biheste* acquired the sense of the simple *hǽs*, HEST, f. *hátan* 'to command'; see HIGHT. Cf. the equivalent BEHOTE, OE. *behát* neut., with its ME. variants BEHETE, BEHIGHT.]

†**be'hight,** *v. Obs.* For forms see below. [An OTeut. compound vb.: OE. *bi-*, *behátan* = OHG. *biheizan*, Goth. *biháitan* (in derivatives), f. *bi-*, BE- + OE. *hátan* = Goth. *háitan* to call, pa. t. *haiháit*, (= *heháit*), pa. pple. *haitans*. The reduplicated pa. t. appeared in OE. as *heht* (:—*'*hehat*:—**he'hât*:—*he'hait*), contr. *hét* (pl. *héton*). As there was no other Eng. vb. exactly parallel, the isolated inflexion of *hátan* and *behátan* was in ME. subjected to a remarkable series of changes, resulting finally in the loss of the original present stem, and the substitution of that of the past as a new present, with weak inflexions. 1. The OE. original forms of the pres. *beháte*, and pa. pple. *beháten*, gave regularly the ME. *behote* and *behoten* (to *c* 1525). The OE. pa. t. *behét* gave ME. *behet* (*-heet*, *-hete*), found after 1400; *beheht* gave *bi-heyght*, *-height*, more usually *behiȝt*, *-hight* (*-hyht*, *-hyght*, and in 15th c. *-hite*). But in the course of the 14th c., the normal forms, *behote*, *behet* *-height* *-hight*, *behoten*, began to be disturbed under the influence of levelling, and of various assumed analogies. 2. Thus, the Present took the vowel of the then archaic past, and became *behete*, *-heete*, frequent in Wyclif, Chaucer, and Lydgate. The Past was occasionally assimilated to the pple. as *behotte*, *behote*; but far more frequently the pple. was assimilated to the pa. t., first as *behet*, *-hete*, then as *beheyght*, *behight*, in 16th c. also *behite*. The Past *behight* was then made weak, as *be-hight-e* (3 syllables; cf. forms like *mighte*, *lighte*); and finally *behight* (*behite*) was taken as present, and the pa. t. and pple. duly became in 16th c. *behighted* (*behited*); cf. *lighted* for earlier *lighte*. Rare forms of the pa. t. were *c* 1400 *behit* (cf. *lit* = *lighted*), and in 16th c. *behoted*, formed on the original present *behote*. See further under the simple HIGHT *v.* Towards the end of the 16th c. *behight* became obsolete, but was kept up by the Spenserian archaists, who often misunderstood its meaning, and employed it in mistaken senses.]

be'holding, *ppl. a.* [f. as prec. + -ING². Sense 1 evidently originated in an error for BEHOLDEN, either through confusion of the endings (cf. esp. the 15th c. spelling *-yne* for *-en*), or, more probably, after *beholden* was shortened to *beholde*, *behold*, and its grammatical character obscured; the general acceptance of 'beholding' may have been due to a notion that it meant 'looking (*e.g.* with respect, or dependence),' or to association with the idea of 'holding of' or 'from' a feudal superior. (It was exceedingly common in the 17th c., for which no fewer than 97 instances have been sent in by our readers.)]

bein (bi:n), *a.* and *adv. Obs.* except *dial.* Forms: 2–7 bene, 5–6 beene, (*Sc.*) beyne, beine, 8–9 bien, bein, 9 been. [Of unknown derivation: the spellings *bein*, *bien*, are merely modern Sc. ways of writing *been*, the regular repr. of ME. *bene*; the latter rimed with words in *ē*, from OE. *é* or *eo*, but no OE. **bén*, **béne*, **beon* is found or etymologically accounted for.

The phonetic history shows that the word cannot be connected with ON. *beinn*, to which, in its fig. sense of 'hospitable,' some have plausibly referred it; that word duly survives in north. Eng. as BAIN. Others have turned to the L. *bene* or Fr. *bien* well; but it is not intelligible how either of these could have been adopted in Eng. as an adjective, which appears to have been the earlier use of *bene*.]

A pun on the name *Isabella*].

B. Used as a formative prefix in *belfader, belsire, beldame, belmoder*, grandfather, grandmother. The explanation of this use, which seems to be entirely English and unknown to French, is not clear; but it answers to the Eng. use of *good* in *goodsire* (*gudscher, gutcher*), *gooddame* (*gudame*), '*godson* or *gosson* filiolus,' and '*goddowter* filiola,' in *Promp. Parv.*, which is again partly paralleled by the mod.F.

bon-papa, *bonne-maman*, grandpapa, grandmamma. The French and English use of *grand*, in *grandpère* grandfather, grandsire, *grand'mère* grandmother, grandame, is capable of more obvious explanation; while the tendency to allow analogy to prevail over sense appears in the Eng. *grandson* as compared with F. *petit-fils*. Still further analogies in the parallel use of *beau*, *belle*, and *good* (though to express a different relationship) are presented by the F. *beau-père* father-in-law, *belle-mère* mother-in-law, *beau-frère* brother-in-law, etc., for which the north. Eng. and Sc. forms are *good-father*, *good-mother*, *good-brother*, *good-sister*, etc.

bel (bɛl), *sb. Electr. Communic.* [f. name of A. G. *Bell* (1847–1922), inventor of the telephone.] A unit, equivalent to ten decibels (see DECIBEL), used in the comparison of two levels of power in an electrical communication circuit. (Non-technical sense in quot. 1958.)

The *bel* as a unit of power level is defined logarithmically as $N = \log_{10}(P_1/P_2)$, where N designates the number of bels and P_1 and P_2 the two amounts of power.

1929 W. H. MARTIN in *Bell System Techn. Jrnl.* VIII. 2 It was further suggested that the naperian unit be called the 'neper' and that the fundamental decimal unit be called the 'bel', these names being derived from..Napier..and Alexander Graham Bell. **1930** *Gloss. Terms Electr. Engin.* (*B.S.I.*) 13 The bel is a unit used in the comparison of the magnitudes of power, voltages or currents at two different points in a network of lines or apparatus. **1937** *Nature* 11 Sept. 447/1 The unit adopted..is the *bel*, which is a ratio signifying a 10-fold increase in intensity, power or energy. Two bels signify a 100-fold increase, three bels a 1000-fold increase, and so on. **1958** K. AMIS *I like it Here* vi. 70 Relaying a girls' choir at a volume of a couple of bels.

be'lace, *v.*[2] '*Sea Term.* To fasten; as to belace a rope.' Johnson. [This is found only in Dictionaries. It appeared first in Bailey's folio, 1730, was retained by Dr. Johnson (who used a copy of that as the basis of his own work), and from him it has been perpetuated by later dictionaries. In Bailey it appears to be merely a mistake for BELAGE, q.v. Bailey's 8vo of 1721 (like the earlier dictionaries of Phillips and Kersey) has '*Belage*, also *Belay* (*Sea Term*), to fasten any running Rope when it is haled, that it cannot run forth again.' This the folio of 1730 splits up into '*Belace* (*Sea Term*), to fasten any Rope,' and '*Belay*, to fasten any running Rope, so that when it is haled it cannot run out again.' Thence Johnson's *Belace* and *Belay*. But the 8vo editions of Bailey retained the original entry and took no notice of *Belace*, till after the appearance of Johnson's Dictionary, when the editor of the edition of 1783 added the fictitious *Belace* from Johnson, while retaining Bailey's original *Belage* or *Belay*.]

belfry ('bɛlfrɪ). Forms: (2–3 berefreid, berfreit), 4 berfrey, -fray, -froiss, 5 barfray, 5–7 belfray(e, 6 belfroy, bellfray, -froy, belfrie, -fre, 6–7 belfery, 6- belfrey, belfry, (7 belfore, befroy, beffroy, 8 bellfry.) [ME. *berfrey*, *-ay* a. OF. *berfrei*, *-ai*, *-ay* (also *berfroi*, later *belfrei*, *belfroi*, *befroi*, mod. *beffroi*), pointing to a late L. type *berefrēdus*, from *bere'frĭdus*, adopted f. Teutonic **bergfrid*; in MHG. *bercvrit*, *-frit*, *berchfrit*, *berfrit* (also *berhfride*), MDu. *bergfert*, *-frede*, in sense 1 below. The subsequent change of the first *r* to *l* by dissimilation from following *r* (as in *armarium*, *almarium*, *almerie*; *peregrinum*, *pelegrin*, *pilgrim*; *parafredus*, *palefrei*, *palfrey*) is common in later med.L.; it is rare, and exceptional in Fr. (where the normal form dropped the *r*, *befroi*, *beffroi*); in Eng. *belfray* did not appear bef. 15th c., being probably at first a literary imitation of med.Lat.; its acceptance was doubtless due to popular association with BELL, and the particular application which was in consequence given to the word. The meaning has passed from a 'pent-house' a 'movable-tower' used by besiegers and besieged, to 'a tower to protect watchmen, a watch-tower, beacon-tower, alarm-bell tower, bell-tower, place where a bell is hung.' The sense of 'pent-house' or 'shelter-shed' is retained dialectally in Lincolnshire and Notts.

The etymology of Ger. *bergfrid*, *bercvrit*, presents some difficulties; but it is generally agreed that the latter part is a form of OHG. *fridu*, OTeut. *friþu-z*, 'peace, security, shelter, place of shelter or safety' (cf. the range of meaning of OE. *friðu*, *frið*, ME. FRITH), the final vowel being dropped as in proper names, *Gottfrid*, *Sigfrid*, etc.; and that the former part is the stem of *berg-en* to protect, defend; the whole meaning 'protecting' or 'defensive place of shelter,' an obvious description of a pent-house fitted to ward off missiles from those to whom it gave shelter during siege operations. (The possibility that *berg-* here means 'mountain' seems precluded by the sense: but see the discussion of the word by Dr. Chance in N. & Q. VI. xii. 284, 412, etc.). For the form taken by *bergfrid* in Romanic, and thus in Eng., cf. the adoption of OHG. *fridu* in late L. as *fridus*, *frēdus* 'peace, protection,' the proper names from G. *-frid*, *Gottefridus*, *Godefrey*, *Galfridus*, *Geoffrey*, and the sb. AFFRAY, OF. *esfrei*, mod. *effroi*, parallel to *berfrei*, *beffroi*. MedL. had the forms *berefridus*, *berfredus*, *bil-*, *bal-*, *belfredus*, *berte-*, *balte-*, *bati-*, *buti-fredus*, with the latter of which cf. the It. *battifredo*, assimilated by popular etymology with *battere* to beat (the tocsin), to strike (as a clock).]

† **1.** A wooden tower, usually movable, used in the middle ages in besieging fortifications. Probably, in its simplest form, it was a mere shed or pent-house, intended to shelter the besiegers while operating against a fortification; but in its developed form it was constructed with many offensive appurtenances, so as to make it a formidable engine of attack. (Also 5 bileeve, byleyue, belyefe, 5–6 byleue, -ve, 6 b'leue, 6–7 *Sc.* beleif.) [Early ME. *bileafe*, *-leaue*, *-leue*, f. *bi-*, BE- + *leafe*:—OE. (Northumb.) *léafa*, shortened from *ȝe-léafa* 'belief,' a common WGer. abstract sb. (= OS. *gilôbo*, MDu. *gelôve*, Du. *geloof*, OHG. *giloubo*, MHG. *geloube*, Ger. *glaube*):—OTeut. type **galaubon-* (but not found in Gothic, which had the cogn. *galaubeins* fem.); f. *galaub-* 'dear, esteemed, valued, valuable'; see BELIEVE. The orig. *ȝeléafa*, *ileafe*, ILEVE, and its short form *léafa*, *leafe*, LEVE, survived till the 13th c., when the present compound, which had appeared already in the 12th c., superseded both. The *be-*, which is not a natural prefix of nouns, was prefixed on the analogy of the vb. (where it is naturally an intensive), so that *believe*, *belief*, go together, as the earlier *ȝeliefan*, *ȝeléafa*, and *liéfan*, *léafa*, did. The vowel of the sb. (*éa*) and vb. (WSax. *ie*, Anglian *é*) were originally different; but the distinction was lost in ME. On the other hand the final consonants were differentiated in 16th c. the sb. changing from *beleeve* to *beleefe*, apparently by form-analogy with pairs like *grieve grief*, *prove proof*. The normal mod.Eng. would have been *beleave* or *beleeve*.]

1. The mental action, condition, or habit, of trusting to or confiding in a person or thing; trust, dependence, reliance, confidence, faith. Const. *in* (*to*, *of* obs.) a person.

(*Belief* was the earlier word for what is now commonly called *faith*. The latter originally meant in Eng. (as in OFrench) 'loyalty to a person to whom one is bound by promise or duty, or to one's promise or duty itself,' as in 'to keep faith, to break faitb,' and the derivatives *faithful*, *faithless*, in whicb there is no reference to 'belief'; i.e. 'faith' was = fidelity, fealty. But the word *faith* being, through OF. *fei*, *feith*, the etymological representative of the L. *fides*, it began in the 14th c. to be used to translate the latter, and in eourse of time almost superseded 'belief,' esp. in theological language, leaving 'belief' in great measure to the merely intellectual process or state in sense 2. Thus 'belief in God' no longer means as much as 'faitb in God' (cf. quot. 1814 in 2). See BELIEVE 1, and 1 b.)

bell (bɛl), *sb.*[1] Forms: 1–7 belle, (4 bill), 4–7 bel, 6– bell. [A common LG. word: OE. *belle* wk. fem. = MDu. and MLG. *belle*, Du. *bel* (in Icel. *bjalla* from OE.), not occurring in other Teutonic languages; perhaps from same root as BELL *v.*[4] to make a loud noise, roar. I. Properly.

1. A hollow body of cast metal, formed to ring, or emit a clear musical sound, by the sonorous vibration of its entire circumference, when struck by a clapper, hammer, or other appliance. The typical form, found in all large bells (and indicated by the expression *bell-shaped*), is that of an inverted deep cup with a recurving brim, which is struck by a 'clapper' or 'tongue,' usually suspended from the centre of the interior.

Other forms, used only in small bells, are a section of a hollow sphere, struck by a hammer impelled by a spring as in the bell of a house-clock, a table bell, etc., and a hollow sphere containing an unattached or freely suspended solid metal ball which answers the purpose of the tongue.

Bells of the regular form vary greatly in size and weight.

a. The larger kinds are used for giving signals of various import (time, danger, etc.) to the inhabitants of a town or district, and especially in connexion with public worship (cf. CHIME); the smaller kinds are used for similar purposes in a house (e.g. *door-bell*, *dinner-bell*, *electric-bell*). **b.** Small bells are frequently used for decoration, e.g. on a horse's trappings, a falcon's leg, the cap of a fool or jester, etc.

bellows ('bɛləuz, 'bɛləs), *sb.* Forms: *a. sing.* 1 -bælg, belg, beliġ, bylg, byliġ, 3 beli, 3–4 bely, ?buly; *pl.* 3–4 belies, bulies, 5 belyes, belise, belice, 6 bales, bellies, bellyis. *β. sing.* 4 belw, belu, below, 5–6 bel(l)owe; *pl.* 4 belwes, bellows, 5 belwis, -wys, -owys, 6 bellowse, 5–7 bellowes, 7– bellows, (*double pl.* 7 bellowses, still *dial.*). [Now used only in plural: the sing. was still in use in 15th c., and still later in compounds. The OE. name for 'bellows' was *blǽstbɐl(i)g*, *blástbɐlg(i)g* 'blast-bag, blowing-bag' (= ON. *blástrbelgr*, Sw. *blåsbälg*, Da. *blæsebælg*, mod.G. *blasebalg*); but already in the 11th c. the simple *bɐlg*, *bylg*, *byliġ* 'bag' occurs in this sense in the glossaries. (So also mod.Sw. *bälg*, and Da. *bælger* pl. = 'bellows.') Thence the ME. *beli*, *bely*, *buly* (*ü*), really the same word as BELLY, under which see the remoter etymology. In the sense 'bellows,' *bely* was still used in the sing. by Chaucer, but after 1400 we find this only with the sense 'belly,' though the pl. *belies*, *bellies* retained the sense 'bellows' late in the 16th c. in literature, and *bellis*, *bellice*, is still common in the dialects. But in Wyclif we find another form, *belu*, *belw*, in 15th c. *bellowe* (apparently of northern or north. midl. origin), of which the plur. *belwes*, *belowes*, *bellows* became established in 16th c. as the literary form, *bellies* being thenceforth used only as the plur. of 'belly' in the modern sense. In later times *bellows* has often been construed as a sing., 'a bellows,' and occasionally has even received a second plural inflexion, *bellowses*, which is common in the dialects; cf. 'a gallows,' and obs. or dial. pl. *gallowses*. Hence also the pronunciation ('bɛləs), the only one known to orthoepists early in the present century, which has however of late largely given place to ('bɛləuz).
The evidence at present available does not settle whether *belu*, *belw*, came down from a non-palatalized form of OE. *bɐlg*, or from the plural inflexions *bɐlga*, *bɐlgum*, while *beli* represented the sing. forms *bɐliġ*, *bɐlge* (cf. ME. sing. *dai*, *dei*, pl. *dawes*:—OE. *dæġ*, *daga*s); or, finally, whether it was a northern Eng. adoption of ON. *belgr*: for each of these hypotheses something may be said. *Bellows* is app. not cognate with L. *follis*: see BALL *sb.*^{1} and BELLY.]
1. An instrument or machine constructed to furnish a strong blast of air. In its simplest form, it consists essentially of a combination of bag and box, formed of an upper and lower board joined by flexible leather sides, enclosing a cavity capable of expansion and contraction, and furnished with a valve opening inwards, through which air enters and fills the expanded cavity, and with a tube or nozzle, through which the air is forced out in a stream when the machine is compressed. It has many modifications of form and structure according to its purpose; and the name is sometimes applied to the 'blower' of a blast-furnace.
a. An instrument or machine of this kind used to blow a fire; it may be portable, as the common hand-bellows, or fixed, as a smith's bellows. Often, with reference to the two halves or handles, called a *pair of bellows*, rarely, as sing., *a bellows*.

belly ('bɛlɪ), *sb.* Forms: 3–4 bali, 4 baly(e, 4–5 bale, 4–6 bely, (5 bylly), 6 bally, bealy(e, bellye, 6–7 bellie, 5– belly. [ME. *bali*, *bely*:—OE. *bælīȝ*, *bęlīȝ*, earlier *bælȝ*, *bęlȝ* 'bag, skin, envelope, hull (of beans and peas),' identical with ON. *belgr* 'skin, bag,' OHG. *balg*, MDu. *balch*, Goth. *balgs* 'bag, sack':—OTeut. **balgi-z* 'bag,' lit. 'inflated or swollen thing,' f. *belgan*, pa. t. *balg*, 'to be inflated, swell up.' The same word of which the plural appears as BELLOWS. The sense 'belly' did not exist in OE., and has not been developed in the cognate langs. Evidence is wanting to show whether it came directly from the sense of a material 'bag,' or whether the meaning 'body' (as the shell or husk of the soul) intervened: cf. senses 2 and 3. The history of the differentiation of *belly* and *bellows* is complicated. The various dialectal forms of the OE. word were WSax. *bięlȝ*, later *bylȝ*, *byliȝ*, Kentish and ESax. *bęlȝ*, *bęliȝ*, Anglian *bælȝ*, *bæliȝ*; these gave the early ME. *buli* (*ü*), *beli*, *bali*, respectively. Of these *beli*, *bely* occurs in sense both of 'bellows' and 'belly'; *bali* only as = 'belly'; *buli(es)* only as = 'bellows.' Hence it may be inferred that the sense 'body, belly' arose first in dialect where the form was *bali*, *baly*, and that this form passed with this sense into other dialects, which could thus discriminate *bali* 'belly,' from *beli*, *buli*, 'bellows.' Meanwhile the north. dial. obtained the distinction in another way, viz. by the establishment of *belw* in sense of 'bellows': thus the *Promp. Parv.* has Bely *venter*, Below *follis*. Finally the pl. *belwes*, *belowes* was generally adopted in that sense, and *beli*, *bely* became the literary form for the part of the body. *Bally* still occurs dialectally, e.g. in Lancashire and Shropshire.]

¶ ***belt of pater-nosters*** or ***of Our Fathers*** :

In the Acts of the Council of Celchyth, an. 816 (Haddan & Stubbs *Councils & Eccl. Doc.* III. 584), occurs the passage 'et xxx diebus canonicis horis expleto synaxeos æt VII beltidum, Paternoster pro eo cantetur,' of which the latter part 'at the seven bell-hours let the Paternoster be sung for him,' has given rise to one of the most grotesque blunders on record. The OE. words *æt* VII *beltidum*, 'at the seven bell-hours,' a gloss on '*canonicis horis*' preceding, were taken by Spelman as Latin, and construed with the following word as a 'paternoster of seven belts,' which he explained as a *rosary*. Du Cange repeated the explanation, though questioning the existence of the rosary at that date. Johnson the Nonjuror (*Eccl. Laws* 1720) elaborately described 'belts' set with studs serving the purpose of a rosary. Scott (Suppl. to Chambers, 1753) suggested as a better rendering, 'a paternoster to be repeated seven times.' In all these there was an attempt to construe the passage, but in later 'explanations' the grammatical construction has been dismissed, and 'VII beltidum, paternoster' transmuted into 'seven belts of paternosters,' as in the following curious specimens of modern mythology:

1844 LINGARD *Anglo-Sax. Ch.* (1858) II. ix. 62 The frequent repetition of the Lord's Prayer, technically called a belt of Pater-nosters. *Note*. A belt of Pater-nosters appears to correspond with a string of beads of later times .. It is probable that the belt contained fifty Pater-nosters. **1849** ROCK *Ch. of Fathers* III. viii. 8 Seven belts of Our Fathers had to be said for the deceased.

Beltane ('bɛltən). [Adopted in Lowland Scotch from Gaelic *bealltainn*, *bealtuinn* (in Irish *bealltaine*, Manx *boaltinn*, *boaldyn*) the Celtic name of the first of May, the beginning of summer.

OIr. forms are *beltene* (in a text), *belltaine*, *beltine* in Cormac's Glossary (9th to 12th c.). The first is prob. the earliest quotable form of the word, of which the original meaning seems to have been unknown even to the glossarist, since he makes a desperate guess at it by transposing *bel-tine* or *bil-tene* into *tene-bil*, and explaining *bil* as '*Bil* from *Bial*, i.e. an idol god,' evidently meaning the Bel, or Baal, of the Old Testament: so that *bel-tene* became 'fire of Bel,' or (?) 'Baal.' Dr. Whitley Stokes has shown that the latter part of the word is not *teine* 'fire,' since this is a *-t* stem (OIr. *tene*, *tened*), while *Beltene* is a feminine *-ya* stem. Whether it can be a parallel derivative of the same root, or whether, as is more likely, the notion that *-taine* was = *teine* 'fire' is due merely to 'popular etymology' cannot be determined. (The ancient Gaels kindled bonfires not only on Beltane, but also on Lammas and Hallowmas.) The rubbish about *Baal*, *Bel*, *Belus*, imported into the word from the Old Testament and classical antiquity, is outside the scope of scientific etymology.]

1. The first day of May (reckoned since 1752 according to Old Style); Old May-day. The quarter-days anciently in Scotland were Hallowmas, Candlemas, Beltane, and Lammas. *Beltane day* (Gael. *la bealltainn*) appears sometimes to have been identified with the nearest Church Feast, the Invention of the Cross (May 3rd), and the name seems even to have been applied to Whit-sunday (May 15th), when this took its place as term day.

Scotl.* II. xiii. 469 The old quarterly terms for paying the School fees were Lammas, Hallowmas, Candlemas and Beltane.

‖**2.** Name of an ancient Celtic anniversary celebration on May-day, in connexion with which great bonfires were kindled on the hills.

This use of the word appears in English much later than the preceding, and only as an alien term applied to the Celtic custom; it may be the original use in Celtic. Cormac's Glossary explains *belltaine* as 'two fires which the Druids used to make, and they used to bring the cattle [as a safeguard] against the diseases of each year to those fires.' Also under *Bil*, 'a fire was kindled in his name at the beginning of summer always, and cattle were driven between the two fires.' Various accounts of Beltane observances lingering in the Highlands and Islands of Scotland, are to be found in 18th c. writers, and esp. in the old *Statistical Accts. of Scotland* 1794-99. A large number of these are collected in Jamieson.

1772 PENNANT *Tours Scotl.* (1774) 42 The superstition of the Bel-tein was kept up. *Ibid.* (JAM.) ben (bɛn), *adv., prep., a., sb.*[1] *Sc.* and *north. dial.* Forms: 4 bene, 5– ben. [Appears first in 14th c. There is no cognate in Scand. languages; so that it must be a dial. variant of ME. *binne*, BIN 'within':—OE. *binnan*, cogn. w. Du., Ger. *binnen*.]

A. *adv.* Within, towards the inner part; *esp.* in or into an inner part of the house relatively, in or into the inner part absolutely; into the parlour, etc. from the kitchen; in the parlour or chamber.

The words *but* and *ben* have special reference to the structure of dwelling houses formerly prevalent in the north, in which there was only one outer door, so that it was usual to enter through the kitchen into the parlour, and through the latter to an inner chamber, bedroom, or the like. In reference to the kitchen, the two latter rooms are *ben* and *far-ben* respectively; they constitute the *ben-end* of the house: in reference to the parlour, the kitchen is *but*, or *but the house*, or the *but end*. These phrases are retained even in more modern houses, where the parlour has a separate entrance: 'go but' = 'go into the kitchen'; 'come ben' = come into the parlour, etc. Also apartments on opposite sides of a passage are said to be *but and ben* with each other, though neither is farther out or farther in than the other: *come ben, go but* are then used of either. Their occupants are said to live *but and ben* with each other.

'bench-mark. a. A surveyor's mark cut in some durable material, as a rock, wall, gate-pillar, face of a building, etc., to indicate the starting, closing, or any suitable intermediate, point in a line of levels for the determination of altitudes over the face of a country. It consists of a series of wedge-shaped incisures, in the form of the 'broad-arrow' with a horizontal bar through its apex, thus ⊼. When the spot is below sea-level, as in mining surveys, the mark is inverted.

[The horizontal bar is the essential part, the broad arrow being added (originally by the Ordnance Survey) as an identification. In taking a reading, an angle-iron 7 is held with its upper extremity inserted in the horizontal bar, so as to form a temporary bracket or *bench* for the support of the levelling-staff, which can thus be placed on absolutely the same base on any subsequent occasion. Hence the name.]

4. A shape or size in which ox- or cow-hides are tanned into leather, forming half of a 'butt.'

A 'butt' is the entire hide of the back and flanks reduced to a rough rectangle, by what is technically called 'rounding,' i.e. cutting off the surrounding thinner parts (the hide of the head and shoulders, and of the belly and shanks on each side of the 'butt'). When this is cut in two by a line down the middle of the back, before tanning (as is mostly done in Scotland and the north of England), each half is called a 'bend.' Butts and bends contain the thickest and strongest hide, the qualities of which are further developed by special processes in tanning, so as to make the stoutest leather. Hence:

b. bend-leather (orig. *northern*): the leather of a 'bend,' i.e. the thickest and stoutest kind of leather (from the back and flanks), used for soles of boots and shoes; sole-leather.

More, Grafton, etc., though *band(e*, alone appears in the versions of the Bible (Tindale and Coverdale have *bonde* in *John* xviii. 3, where the later versions have *bande*; but the word is not frequent in any form before the Geneva version of 1557). *Bend* is rare after 1600; the Shaks. folio of 1623 has always *band*. B. (with object expressed) *prep.*

The prepositional use of *beneath* seems originally to have been introduced to express the general notion of 'lower than,' as distinguished from the specific sense of UNDER. But in process of time *beneath* was so largely used for *under*, that BELOW was laid hold of to express the more general idea. In ordinary spoken English, *under* and *below* now cover the whole field (*below* tending naturally to overlap the territory of *under*), leaving *beneath* more or less as a literary and slightly archaic equivalent of both (in some senses), but especially of *under*. The only senses in which *beneath* is preferred are 7 ('beneath contempt'), and fig. uses of 4 (e.g. 'to fall beneath the assaults of temptation').

bent (bɛnt), *sb.*[1] Also bennet. [A word of difficult history. In the sense of 'stiff-grass' or 'grass-stalk' (in which alone the variant *bennet* occurs), it appears to be the representative of OE. *beonet-*, found as a frequent element in proper names, as *Beonet-léah* Bentley (see Index to *Cod. Dipl. ævi Saxon.*). These names do not show the meaning; but *beonet*:—earlier **binut* (with *eo* as *u-* umlaut of *i*), in OS. *binet* (Schade), is phonetically identical with OHG. *binuz*, MHG. *binez*, *binz* (str. masc.), mod.G. *binse* 'rush, reed, stout grass growing in wet places':—WGer. **binut*, of unknown etymology. But distinct instances of this sense are not found before the 15th c., while the sense of 'grassy field or surface' is common in northern writers from the earliest appearance of northern literature. Whether this is the same word is uncertain: it is possible enough that the pl. *bents* was used for a place where 'bents' grew (cf. local names like *Totley Bents* near Sheffield) and that this led to the use of the sing. *bent* as 'open grassy place.' They are here united provisionally.]

I. 1. A name given to grass of a reedy or rush-like habit, or which has persistent stiff or rigid stems; also to various grass-like reeds, rushes, sedges, and other plants.

Britten and Holland *Plant-n.* give a long list of grasses and other plants, to which the name, either simply or with attribute, is locally applied: by the seashore it very generally means the Sea Reed Grass, *Psamma or Ammophila arenaria*, but also *Carex arenaria*, *Elymus arenaria*, *Triticum junceum*, according to locality; on northern moorlands often *Juncus squarrosus*, but also *Nardus stricta*, etc.; in some pastoral and hay districts *Cynosurus cristatus* ('Hendon Bent'), *Agrostis vulgaris*; in other localities, *Phalaris orundinacea*, *Scirpas locustris*, or other marsh-grasses, bulrushes, reeds, or sedges: in Chester and Wiltshire, the name is even given to the common heath and ling, perhaps because they grow on bents: cf. 'heath.'
